Abstract (en)
[origin: EP0087684A1] 1. A pull-out table (1) with at least two legs (4, 5) with a table top consisting of at least two parts (2a, 2b) arranged in one plane, the one part of which, when the other part is being shifted, is shifted in the opposite, essentially horizontal direction, characterized by the fact that the legs (4, 5) are movable relative to each other and to the parts (2a, 2b) in the shifting direction of said parts and that they are connected to each other and to the parts by a transmission device (7) so that by a change in distance (a) of the movable parts (2a, 2b) the distance (b) of the legs (4, 5) is changed in the same direction but by a shorter distance.
