Abstract (en)

[origin: EP0088005A1] 1. A method of fixing a sheet of wood inside a champleve formed in a rigid support, this method being characterized in that it comprises at least the following successive phases : partial impregnation of the sheet of wood, from one of its faces, with a curable resin, an operation for bonding said sheet by its previously resin-impregnated face in the champleve and surface treatment for bringing the edges of the champleve and the surface of the wood to the same level by thinning down the sheet of wood and simultaneously machining the edges of the champleve.
