Abstract (en)
[origin: EP0088233A2] 1. Manual belt grinding machine with an end-less grinding belt (1) run over two guide rollers (2, 3) and a pressure shoe (4) with a drive unit (6) arranged above the grinding belt with a handle (5) and with a fan for dust extraction and an extraction channel with an extractor opening which can be covered with a dust bag, on which the drive unit (6) is placed in the area of the front guide roller (2) and the extractor opening (14) is arranged approximately above this front guide roller (2), characterised in that the extractor opening (14) is open forwards and provided there with a holding flange (15) for an easily removable clamp holder (16) for the dust bag (17), which is constructed in such a way that it is fitted at right angles in front of the manual belt grinding machine.
