Abstract (en)

For easy interconnection of two printed-circuit boards, a connector device is composed of a male connector having connector pins and mounted on an end of one of the printed-circuit boards, and a female connector having connector pin sockets and mounted on an end of the other printed-circuit board. The printed-circuit boards are put together perpendicularly to each other with the connector pins fitted respectively in the connector pin sockets. The printed-circuit boards are interconnected mechanically and electrically by the connector device.
