Abstract (en)

[origin: EP0089461A2] Seal for the ends and joints of external panels, in particular double-webbed panels, of greenhouses, halls or the like. To facilitate attachment, the seal consists of a dished cover rail which lies on the outside of the two joint-forming panels and which is provided on its underside with a connecting profile, onto which, at a distance therefrom, a dished holding plate, equipped with a counter-profile adapted to the connecting profile of the cover rail, can be clipped transversely to the direction of the joint. <IMAGE>
