Abstract (en)

[origin: EP0089642A1] A machine for printing and handling self-adhesive labels, tags, cards or the like for use in identifying articles. It comprises a drive roller (20) for the web movement and a pressure roller (21) pressing said web (11) against the drive roller (20) and is characterized in that the assembly comprising the drive roller (20) and pressure roller (21) is movable from a first position immediately upstream of the printing head (14) to a second position, not interfering in the path of said web (11) before said web reaches said printing head (14) that is a position downstream of the doctor blade (15) for the separation of the label or the like, so that the web (11) can encircle the drive roller for a substantial length of its periphery. These machines are used in preparing tags for cloths articles, or in packaging prepared foods in supermarkets.
