Abstract (en)
[origin: EP0089906A1] 1. A system for mounting round or substantially round stones for articles of jewellery in which the stones are carried by a mounting or body (1) delimiting a frame or housing (3) within which they are fixed, the body (1) having : on the one hand orifice (4) in the base of the frame or housing, which are equal in number to the stones (2), are arranged in at least two parallel rows, and act as a support and a housing for the tips of the pavillon (8) of the stones ; and on the other hand, a groove (7) in its peripheral wall, in which rest the girdles (9) of the stones (2), characterised in that the stones (2) are placed longitudinally and transversely edge to edge but every four delimit an orifice through which passes a rod (6), the lower end of which is fixed to the base of the body (1) and the upper end (10) of which is set above the girdles (9) of the four stones (2).
