Abstract (en)

[origin: EP0090441A1] De asphalted oils and distillates are produced from asphaltenes-rich hydrocarbon mixtures (101; 201) by a process comprising subjecting the feed to thermal cracking (105; 205) and subjecting the resultant-heavy fraction (104; 204) to a combination of a catalytic hydrotreatment (106; 207) and a solvent deasphalting (107; 206).
