Abstract (en)
[origin: EP0090495A2] The invention relates to formwork for supporting an arched head over a window or door opening. The formwork (8) includes a front horizontal portion (10), a front upright portion (11), an upper arched portion (12) and a rear vertical portion (13 or 23). At each end of the formwork the upper arched portion (12) merges into a horizontal extension (14). In one embodiment of the invention the upper arched portion (12) interconnects the arcuate upper edges of the front vertical portion (11) and the rear vertical portion (13). In another embodiment of the invention the rear vertical portion (23) has a straight upper edge (21), the height of which is greater than the maximum height of the front vertical portion.
