Abstract (en)

The spacer comprises a central stud (11), an outer ring (12) surrounding the central stud at a distance from it, and joining pieces (13) joining the central stud having substantially co-planar supporting top surfaces, and the outer ring having an apparent modulus greater than that of the stud, so that each flagstone supported by the spacer thus rests on the ring with its corner on the stud. <IMAGE>

Abstract (fr)

Le plot comporte une pastille centrale (11), une couronne extérieure (12) entourant la pastille centrale et espacée de celle-ci, et des éléments de liaison (13) reliant la pastille centrale présentant des surfaces supérieures de support sensiblement coplanaires et la couronne extérieure présentant un module apparent supérieur à celui de la pastille, chaque dalle supportée par le plot étant ainsi en appui sur la couronne et, dans son angle, sur la pastille.
