Abstract (en)

[origin: WO8301253A1] A monofilament of low carboxyl content for use in fabricating a paper machine dryer fabric having improved resistance to hydrolytic degradation and abrasion. The monofilament comprises a polyester, a polyester stabilizer and a thermoplastic material. Method of producing same as well as composition therefor are also disclosed.

Abstract (fr)

Monofilaments à faible teneur en carboxyl destinés à être utilisés dans la fabrication de tissus de séchage de machine à papier, présentant une résistance améliorée contre la dégradation hydraulique et l'abrasion. Le monofilament comprend un polyester, un stabilisateur polyester et un matériau thermoplastique. On décrit également le procédé de production ainsi que la composition de ce produit.
