Abstract (en)
[origin: EP0090974A1] 1. A braking device for a cable reel (1) which is mounted on a stationary flange wall (2) so as to be rotatable and can be driven by a spiral spring in the direction of winding, in which braking device a braking element is provided which acts directly on the periphery (4) of one of the walls of the cable reel, characterised in that the braking element consists of a strip (5) which is fastened at one end to the flange wall (2) and which at least partially embraces the periphery (4) and the other end of which is connected to a tension spring (8) which is also fastened to the flange wall (2).
