Abstract (en)

[origin: EP0091340A1] 1. A parallelepiped-shaped booth with one wall-free face closed by a door swivelling mounted on the vertical axis located at the centre of said face, wherein said door is shaped as a semi-cylinder housed in the open space of the booth which swivels around said central vertical axis, said semi-cylinder forming a multivalent cabinet equipped to bear sanitary ware, and/or household appliances, and/or cloakroom facilities, and wherein said booth provides an open space either for housing said semi-cylinder of the door or for forming a three-dimensional space used as a private cabinet when said semi-cylinder is swivelled outside the booth.
