Abstract (en)

[origin: US4517163A] The disclosure relates to a process for making titanium dioxide concentrates from material containing titanium oxide and iron oxides. More particularly, the titanium oxide-containing material is calcined at temperatures of 870 DEG to 1300 DEG C., and then treated with a chlorine-containing gas at temperatures of 800 DEG to 1300 DEG C., if desired with addition of carbon.
