Abstract (en)
[origin: EP0091587A2] 1. A coke-mass conveying truck with a chassis that is transportable along the length of a battery of coking chamber of a coke-oven, with an operational chassis mounted on the conveyor chassis that is itself moveable in the direction of length of the conveyor chassis, and several operational assemblies such as door-lifting equipment, doorframe cleaning equipment, coke-mass guides, etc, mounted on the operational chassis, possibly with a driver's cabin permanently fixed to one end of the truck chassis and possibly with a cabin for hydraulic equipment permanently fixed to the other end of the truck chassis, in which a runway provided on the longitudinal side of the truck chassis remote from the coking chambers basically extends from one end of the truck chassis to the other, characterized in that runway (10) is constructed in two parts, namely consists of two preferably equal lengths of runway (12, 13) located consecutively in the direction of length of the truck chassis (4), and that the lengths of runway (12, 13) are located at the height of the operational chassis (5) and are movable with the operational chassis (5) in the direction of length of the truck chassis (4).
