Abstract (en)

[origin: EP0091977A1] 1. Spreader, preferably for loading containers in and/or out of ships, comprising a spreader frame and a suspension derrick which is displaceable on the frame by means of a piston-and-cylinder construction, characterized by a piston-and-cylinder arrangement (6), one end of which is secured to the displaceable derrick (2) and the other end of which is secured to a displaceable cross-beam (7), each end of which is provided with an additional piston-and-cylinder arrangement (8 ; 9), the other end of each said additional arrangement being secured to the spreader frame (5).
