Abstract (en)
[origin: EP0092220A2] 1. A fluorescent lamp for stimulating a balanced plant growth in which the phosphor blend applied to the inner wall of the lamp envelope comprises three components, the first component used being a manganese activated magnesium fluorogermanate with an emission maximum at 660 nm and the second component used being a tin-activated strontium magnesium orthophosphate with an emission maximum at 626 nm, characterized in that the third component is a barium magnesium aluminate activated with divalent europium and having an emission maximum at 447 nm.
