Abstract (en)  
[origin: EP0095195A2] The ammunition feed to the gun carriage of an armoured vehicle or similar weapon carrier, which has an automatic cannon which can move about a horizontal axis (9). The cartridge magazine (4,5), the supply duct (2,3), and the gun (1) on the gun carriage can rotate about a vertical axis (8). The ammunition is supplied by a flexible, endless belt (15,16) with a limited twist, which is driven by a power source, independent of the gun. The belt is made of rubber with an inlay of textile fibres. The feed system is suitable for ammunition of up to 40mm in dia..
