Abstract (en)  
[origin: EP0095664A2] 1. Control device for a printing machine including an operating panel having a plurality of push buttons or similar actuating devices, said control device being provided with a first group of push buttons (1-1 through 1-17) for selecting a command to be induced or a machine operation state, at least two manipulations being necessary for inducing a command execution or a change in the machine operation state, including at least one indicator panel, in particular a light-emitting diode indicator panel, characterized - in that there is provided a second group of push buttons (2-1 through 2-6) for selecting an information indicated on a indicator panel by actuating one of said push buttons, and - that a switchable visual indicator is assigned to each push button of the second group of push buttons (2-1 through 2-6), said indicator being activated by actuating a push button of the first group of push buttons (1-1 through 1-17).
