Abstract (en)

Detergent liquors, and compositions for their production, are provided in which acetylated aldohexopyranoses and -pyranosides are employed as peroxybleach precursors in combination with inorganic perhydrate salts, the molar ratio of perhydrate to aldohexopyranose or -pyranoside being \geq 12:1 and the liquor starting pH being $> 9,5$, whereby \geq 50% of the available acetyl groups are perhydrolysed.
