Abstract (en)
[origin: EP0095904A1] Detergent liquors, and compositions for their production, are provided in which acetylated aldohexopyranoses and -pyranosides are employed as peroxybleach precursors in combination with inorganic perhydrate salts, the molar ratio of perhydrate to aldohexopyranose or -pyranoside being $\geq 12:1$ and the liquor starting pH being $> 9,5$, whereby $\geq 50\%$ of the available acetyl groups are perhydrolysed.
