Abstract (en)
[origin: WO8302173A1] A silver halide emulsion for photographic use and a process for its preparation. A monodisperse silver halide emulsion containing silver halide grains of octahedral or tetradecahedral crystals having a recess in the center of the (1 1 1) face suffers less fogging and has high sensitivity. This emulsion is prepared by treating a monodisperse silver halide emulsion containing silver halide grains of octahedral or tetradecahedral crystals with a solvent for silver halide.
