Abstract (en)
[origin: EP0096898A1] 1. Pot drawer for cupboards with a base plate (10) guided displaceably in lateral guide rails, a frame (14) projecting vertically upwards and surrounding the base plate at the lateral and rear edges, and with a front plate (12), characterized in that the frame (14) is designed as a self-supporting part to be fastened to the base plate (10), the front plate (12) being fastened at the ends of the frame facing the front plate, two essentially vertical fastening strips (34) being attached to the inner face of the front plate, the frame (14) having a hollow structure engaging around the fastening strips, the fastening strips and the frame being connected by means of connecting devices (30, 36, 40, 46), allowing a vertical/tilting and/or lateral adjustment of the front plate (12) with respect to the base plate (10).
