Abstract (en)

[origin: EP0096909A1] 1. Change-over apparatus for a change-over of a gas stream from a converter between a flare stack and a gasholder without an occurrence of pressure surges, which apparatus comprises a housing having a gas inlet and two gas outlets, shut-off valves with actuators, said measuring and automatic control devices, characterized in that the shut-off valves consist of bell-shaped valves, which have a flow area that is approximately proportional to their displacement and are provided with actuators which operate independently of each other.
