Abstract (en)
A carding engine in which the calender unit (7) is driven directly from a motor (10), a coiler (31) and autoleveller (30) (if parallel) are driven by gearing from the calender unit. A belt drive (15) transmits power from the calender unit (7) to the web take-off system comprising a doffer (2), stripper roller (3) and crush rolls (4).
