Abstract (en)
[origin: EP0097140A2] A Venetian blind to be mounted in a window casement (10) or window frame, comprising a channelled suspension rail (11) arranged horizontally at the top and mounting the operating mechanism of the blind, and two vertical guide rails (20) for the slats (12) of the blind, mounted one at each side and forming a support for the associated end of the suspension rail. This rail at one end thereof is positively engaged with one guide rail while a manually adjustable latch element (26) is provided at the other end of the suspension rail for positive engagement with the other guide rail (20).
