Abstract (en)

[origin: EP0097315A2] 1. Oil burner arrangement for field ranges with a fuel container (14) with a fuel supply line (16, 20, 21) supplying the fuel to a main burner (5) and with a vaporiser (2) heatable by the main burner arranged in the fuel supply line, with a spraying fuel injector being arranged at the inlet end of the vaporiser introducing the oil in the form of a cloud of oil vapour, characterized in that there is associated with the vaporiser (2) a starter mixing fuel injector (7) heating it up at the beginning of operation, which contains a burner nozzle (39a), a fuel chamber (38) arranged before the inlet to the burner nozzle, an air injection nozzle (34) opening into the fuel chamber, arranged centrally with respect to the burner nozzle, and a perforated burner tube (31) surrounding the burner nozzle.
