Abstract (en)

[origin: WO8302316A1] Bladed heat exchanger, particularly for a convector. The transversal blades (4) are of polygonal shape, the collector-distributor branches (3) being arranged at two opposite ends of each blade, said blades (4) not extending laterally beyond the collector-distributor branches towards the outside of the exchanger and being connected to said branches according to an inclined plane. The body of the exchanger is traversed by the gas flow. Usual applications of exchangers.
