Abstract (en)
[origin: EP0097895A2] The package (1) consists of two trough-type inner containers (3, 4) which are arranged in a common cover (2) abutting each other in the longitudinal direction. In order to avoid damage to the contents, for example cigarette shells (10), during storage and/or removal, the trough-type inner containers (3, 4) are provided with at least one strip (8, 9, 15, 16) which partially covers the trough opening. In one exemplary embodiment, three edge strips (8, 9, 15 or 16) are provided which bound the trough opening in a U-shape. The edge strips (8, 9, 15 and 16) can be designed to be bent or torn off. <IMAGE>
