Abstract (en)

Reinforcement of a moldable material by means of fibers comprised of a filiform body provided at each of each ends with an anchoring device consisting of one or a plurality of volumes of any shapes and of which all cross-section dimensions are larger than the diameter of the filiform body.

Abstract (fr)

Le renforcement d'un matériau moulable est constitué de fibres composées d'un corps filiforme pourvu à chacune de ses extrémités d'un dispositif d'encrage constitué d'un ou plusieurs volumes de formes quelconques dont toutes les dimensions transversales sont supérieures au diamètre du corps filiforme.
