Abstract (en)

[origin: EP0098933A2] 1. Fitting for the leaf (3) of a window, a door or the like and which can be at least raised and/or tilted in a fixed frame (1), with a gear mechanism (4) in the leaf (3) for raising and lowering purposes and for controlled tilting which is coupled on the closure side to a drive rod (6) for actuating the lifting and tilting mechanism, characterised in that supported on the drive rod (6) is at least one resilient buffer member (8) which furthermore bears on support (9) with the leaf frame, the buffer member being elastically tensioned when the leaf (3) is lowered and at least partially relieved when the leaf is raised.
