Abstract (en)
[origin: EP0099046A2] 1. A process for producing a combination yarn by texturing a false-twist-textured filament yarn in a fluid nozzle together with an overfed smooth filament yarn, the fiber-forming substance of the combination yarn components comprising high molecular weight fiber-forming polyester, preferably polyethylene terephthalate, which comprises using as the smooth filament yarn an undrawn, highly preoriented filament yarn having a yield stress of above 7.5 cN/tex.
