Abstract (en)

[origin: EP0100298A1] 1. Device for displacing technical drawing aids during the preparation of a repetitive india ink drawing or strip-film original, having a graduated scale which comprises a number of selected graduations and is disposed on a support (18; 30; 38; 58; 78), the graduations being disposed in two straight or curved rows (16, 16; 27, 28; 35, 35; 53, 54; 73, 74) running perpendicular thereto, characterized in that directly consecutive graduations are situated alternately in one row or the other, and that the spacing between two adjacent graduations of one row increases or decreases at least here and there relative to the opposite spacing between the graduations of the other row as a function of the desired pattern.
