Abstract (en)  
[origin: EP0100431A1] 1. Soundproof and insulating wall lining, consisting of - surface elements (11), which are provided with a layer of insulating material (12) and are fixed by support profiles (2) to a supporting framework (1), and - the supports (13) spanning at least the layer of insulating material (12) for the application of an outer protection (17, 18), characterised in that - each support profile (2) is provided with a U-shaped recess (7) pointing upwards and a U-shaped recess (9) pointing downwards, - the lower recess (9) having at least double the cavity depth of the upper (7), and that - each element (11), which is already provided in the workshop with a layer of insulating material (12), is held above and below by the supports (13) fixed thereon in the U-shaped recesses (7, 9) of the support profiles (2).
