Abstract (en)
[origin: EP0100486A2] 1. A cabinet with a case (1) and a pivotably mounted door leaf (7) associated with the latter and a light (2) which, when the door leaf covering the case is closed, illuminates the room and, when the door leaf is opened, illuminates the interior of the cabinet in the case and leaves free the edge area of the closed door leaf facing the pivot axis (9), the door leaf (7) having an opening angle greater than 90 degrees and less than 180 degrees relative to the front of the cabinet, characterized in that the pivot axis (9) engages an elongated extension which projects beyond the door leaf (7) in the plane thereof, the light (2) is provided in the region bounded by the elongated extension and the door leaf (7) when the latter is closed and, during opening and closing, the edge area of the door leaf comprising the extension can be swung past the light, and the door leaf comprises an inner mirror (12).
