Abstract (en)

[origin: EP0100864A2] 1. Housing, in particular a pressure tank, with a panel which has indicia embossed from behind and is fixed by means of an adhesive layer to the housing, which on application of the panel is forced into the embossed recesses, characterised in that the adhesive and the surface condition of the housing (2) and the panel (3) are so arranged relative one to the other that the adhesive strength between the adhesive layer (4) and housing (2) and the strength of the adhesive layer itself are greater than the adhesion strength between panel (3) and adhesive layer.
