Abstract (en)

[origin: DE3317624A1] An arrangement for building-in an electric cooking plate (11) in a mounting plate (19) contains an insert ring (31) which effects centring of a seal (26) between the edge of the opening of the mounting plate (19) and the cooking plate. At the same time, the insert ring (31) is constructed such that by means of inwardly- directed tabs (47) it effects a centring of the cooking plate (11), in order to prevent the cooking plate (11) slipping relative to the mounting plate (19). <IMAGE>
