Abstract (en)
[origin: EP0101329A1] 1. A receiver of wastepaper basket type comprising a receiver basket (1, 1') mounted on a support (2, 2') and a lid (3, 3') which pivots about a spindle (4) integral with the said support, the receiver basket being arranged to be able to tilt forwards with respect to the support when the lid is opened and the lid when it is closed keeping the receiver basket flat against the support, characterized by the fact that the lid and the receiver basket included complementary members (7, 7'-9, 9') forming a cam so that when the receiver basket is in its position tilted forwards and then the lid is closed again, the receiver basket is brought back again towards its position flat against the support.
