Abstract (en)
Calendar formed by two parts. Whereby it is possible without calculation to read the entire month of a year chosen from a predetermined number of years. The invention relates, for example, to a rule formed by two parts, one being stationary and the other movable, giving the entire chosen month after figures belonging to these two parts have been matched up.

Abstract (fr)
Calendrier formé de deux parties. Permettant de lire sans calcul le mois entier d'une année, choisi parmi un nombre déterminé d'années. L'invention concerne par exemple une règle formée de deux parties l'une fixe et l'autre mobile donnant le mois entier choisi après la mise en corcondance de chiffres propre a ces deux parties.
