Abstract (en)
[origin: WO8302930A1] The scellable coated paper cup comprises an envelope (1) closed with an overlapping seam. The overlapping extends on a large surface and comprises an unfoldable handle (8) from the outer layer of the overlapping. The overlapping joint comprises essentially two seams, the first seam (6) being sealingly provided at the inner edge of the overlapping and the second seam (12), of lower quality, at the outer edge of the overlapping. The manufacturing cost of a high quality seam is required only for the first seam (6).
