Abstract (en)

[origin: EP0102060A2] 1. Sliding formwork maker (16) having a prescraper (32) fitted vertically adjustably on a frame (16a), a pressure plate spaced therefrom and forming an upper sliding formwork and a vibrator (30) in the intermediate region, characterized by a slit level sensor (56, 58, 62) in the region between pre-scraper (32) and pressure plate (26) for the fill material (24), a vertical adjustment drive (49, 50, 82) for the Pre-scraper (32) and a regulating device (68, 74, 76) which compares an ascertained actual silt level with an ideal silt level and controls the vertical adjustment drive in the direction of a reduction of the difference of level.
