Abstract (en)

[origin: EP0102276A2] The method consists in securing the stones in their seating by means of a continuous metal wire (3e) which runs along a portion of the periphery of the said stones which are arranged on alternate sides of the wire (3e) and which is secured periodically to the mounting, while forming setting loops for the stones whose periphery it runs along, complementary setting means (3d, 3f) being provided on one or more opposing portions of this periphery. Manufacture of jewellery. <IMAGE>
