Abstract (en)
[origin: EP0102289A1] 1. Appliance for hair cutting and hair care by singeing, comprising a metal wire or strip (4) capable of being made incandescent, of a length between approximately 3 and 20 cm, retained at each of its ends by two fasteners fixed to a support (1), at least one of which is flexible and ensures a substantially constant tension of the wire or strip, whatever its temperature, characterized in that the fasteners consist of a pin (13, 13') engaging into a female socket, one (12) of which is stationary and fixed to the support (1), whilst the other (12') is mounted on a sliding rod (20) guided by a sleeve (21), parallel to the wire (4) and subjected to the action of a spring (22) which tends to move it away from the stationary socket (12) thus ensuring the tension of the wire.
