Abstract (en)  
[origin: EP0102345A1] 1. A mold (1) of a continuous casting plant, in particular of a continuous casting plant for the production of steel strands having slab cross-sectional formats, comprising mold side walls (3, 4) adjustable to different strand dimensions and supporting means, such as foot rollers (11), arranged below the mold (1) for supporting the strand emerging from the mold (1), which supporting means (11) are fastened to the mold (1) by holding means, such as clamping bolts (30) drawing anchors, or the like, which are detachable from above and are inserted in cavities (32) penetrating the mould side walls (3, 4) and leading as far as to the upper side (31) of the mold side walls, characterized in that the supporting means (11) are arranged on adjusting means (15 ; 41) for displacing the supporting means (11) approximately perpendicular to the axis (19) of the mold (1) and the adjusting means (15 ; 41) are fastened to the mold side walls (3, 4) by the holding means (30).
