Abstract (en)

[origin: EP0102515A2] 1. Projectile weaving machine comprising a harness uncouplable from the machine drive by a dog coupling, a hand lever for disengaging the dog coupling and a drive couplable to the harness for reverse turning thereof, characterized in that the couplable drive for reverse turning of the harness (8) consists of an electrical coupling (13) and an electric motor (14) with return stop and that associated with the hand lever (5) is an electrical switch (16) which in the disengagement position of the hand lever switches current to the electrical coupling (13) and to an electrical switch (17) preceding the electric motor (14) with return stop.
