Abstract (en)  
[origin: EP0103221A2] 1. Transportable concrete cabin, especially a transformer station, with a flat roof (11) resting on the outer walls (10) of the cabin and with ventilation slits (12) in the region between the flat roof and the outer walls, a channel-shaped cover (13) extending all round being arranged on the outside of the ventilation slits, characterized in that the cover is arranged under the flat roof for protection and consists of sheet-metal sections (14, 16, 17) which are partially perforated and which are shaped so that they can be joined together to form either a cover (13) with ventilation orifices pointing upwards or a cover with ventilation orifices pointing downwards, the shape of the ventilation slits (12) remaining constant.
