Abstract (en)  
[origin: EP0103562A2] 1. Rotary knob arrangement on a door leaf, in which the rotary knobs (5, 6) are mounted rotatably on bearing parts (3, 4) secured to the door leaf (1) and are connected to one another by way of at least one eccentrically mounted pin (21) extending through the bearing parts (3, 4) and the door leaf (1), wherein there acts on the pin (21) a connecting hook (32) for the actuation of the latch (29), characterised by the following features : a) the connecting hook (32) is connected to the latch (29) by means of a screw (31) which extends in the longitudinal direction of the latch, which permits a swivelling of the connecting hook (32) and which is securable against self-acting rotation, b) the screw (31) which is securable against self-acting rotation is rotatable from the front end face of the latch (29).
