Abstract (en)

[origin: WO8301300A1] A sabot (1) for use in combination with a pellet (4) for an air, gas or spring gun comprises a plurality of members (3) which extend in the direction in which the pellet is intended to be propelled, said members being provided with portions (40) which, when the sabot and pellet combination is in a gun barrel, extend inwardly to engage the pellet to prevent forward movement of the pellet in the sabot.
