Abstract (en)

[origin: WO8303041A1] Plant growth stimulator formulations comprising one or more long-chain carboxylic acids having between 14 and 48 carbon atoms, and salts, esters, and derivatives thereof, and at least one metal ion having a valence of +2 to +3. The formulations of the invention are highly useful in stimulating the growth of plant life and yield of crops in the field when applied as foliar sprays, seed soaks, and soil drenches.
