Abstract (en)  
[origin: EP0104459A2] 1. Seating unit with two benches (3) arranged against a longitudinal partition (1) to face one another and having a table top (2) between them mounted on a guide device of the longitudinal partition (1) so that its height can be adjusted between a table position and a lower bed position, and with a counterbalancing device for the masses to be moved during adjustment, characterised in that the table top (2) is held on the longitudinal partition (1) with at least one parallelogram guide (10a, 10b, 12a, 12b), which passes through the longitudinal partition (1) and is anchored to the back of the longitudinal partition (1) facing away from the table top (2), and in that the counterbalancing device comprises at least one preloaded cylinder-piston unit (16) that engages with the parallelogram guide.
